SITUATION SUMMARY

SPILL: 15-5318, Marin City, Marin County

On 09/10/15 at 0740 hours the California State Warning Center received a report from the Vallejo CHP Dispatch Center advising that 14,000 gallons of paint had been released into a creek bed after a big rig jack knifed and the trailer landed on its side.

- The Cal OES Fire Duty Officer (FDO) advised the following at 0910 hours: Flat bed truck carrying road striping paint in bladders. 5 bladders spilled, estimated 1,200 - 1,500 gallons. The release flowed downhill to a dry seasonal creek bed, the creek is unnamed. The paint is drying not flowing.
- The road will be shut down for approximately 3 hours per CHP.
- The driver had minor injuries. When he was attempting to upright the rig, he fell 8 feet off the rig and into the creek. He declined transport.
- The California State Warning Center (CSWC) is making full notifications per the Hazardous Materials SOP. Including the following: OSPR, State Parks, Regional Water Quality Control Board (RWQCB), US EPA, Marin County Warning Point (WP), Marin County Environmental Health, SF Bay Conservation and Development (BCDC), East Bay Parks, US Fish and Wildlife Service (USFWS), California Department of Public Health (CDPH), State Drinking Water Program (DWP), US Coast Guard (USCG), Department of Toxic Substance Control (DTSC).
- The following WP's have also been briefed: Alameda, Contra Costa, Napa, San Francisco, San Mateo, Santa Clara, Solano, Sonoma County.
- Cal OES Duty Officers are gathering information and will provide updates as they become available

Cal OES Activation Status

- The State Operations Center (SOC) is activated at Level 1.
- The Coastal REOC is activated at Level 1.
- The Inland REOC is activated at Level 1.
- The Southern REOC is activated at Level 1.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

A heat event is currently affecting California. Widespread triple digit temperatures are forecast statewide. Friday is predicted to be the warmest day this week potentially putting high temperature records in jeopardy. Slight cooling can be expected this weekend with temperatures possibly returning to normal by early next week.

Flash Flood Watches are in effect through Thursday evening for areas in Los Angeles, San Bernardino, Riverside, San Diego Counties.

SITUATION SUMMARY

Exercise in Coastal Region: (New)

Urban Shield/Yellow Command - Urban Shield will be taking place 09/11/15 - 09/14/15, attached below is a link to the event schedule. The event is kicking off and ending at Alameda County Fairgrounds 4501 Pleasanton Avenue, Pleasanton.

Urban Shield is a full-scale regional preparedness exercise assessing the overall Bay Area UASI Region's response capabilities related to multi-discipline planning, policies, procedures, organization, equipment and training. Urban Shield continues to test regional integrated systems for prevention, protection, response and recovery in our high-threat, high-density urban area. The exercise evaluates our existing level of preparedness and capabilities, identifying not only what we do well, but areas in need of improvement.

The overarching goals of Urban Shield include striving for the capability to present a multi-layered training exercise to enhance the skills and abilities of regional first responders, as well as those responsible for coordinating and managing large scale events. Urban Shield is implemented to identify and stretch regional resources to their limits, while expanding regional collaboration and building positive relationships.

Yellow Command is a part of Urban Shield where we are testing communication and coordination between jurisdictional EOC's. Yellow Command seeks to test the following capabilities. We will exercise and evaluate regional catastrophic earthquake mass transportation/mass evacuation plan. We will maintain a common operating picture and sit awareness using WebEOC/CalEOC HSN and Cal COP. Test alternative communication paths across operational areas, using radio and satellite phone capabilities. Exercise and evaluate the regional JIC. Yellow Command will be conducted at the following areas; Levi Stadium in Santa Clara, Marin County, Nine Op Area EOC's, Four Local EOC's, Coastal REOC, FBI EOC, WETA EOC, BART, VTA and SMART EOC's, FEMA Region IX Watch Center, and SB50 virtual JIC. Exercise is scheduled to take place from 0830 to 1230.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure overhead will prolong dry weather and above normal temperatures for interior locations through the work week. Coastal temperatures will remain more seasonal with morning clouds and afternoon clearing. The ridge will begin to break down on Friday bringing seasonal temperatures back to northern California over the weekend.

Medford Weather:

An expansive ridge of high pressure over the Pacific Northwest continues to bring warm and dry air across the interior. This will push many locations to near calendar day record high temperatures this afternoon, and then, likely, to record calendar day highs on Friday as temperatures peak around 20 degrees above calendar day normals.

Reno Weather:

Strong high pressure over eastern California will continue to bring very warm afternoons with dry conditions. Cooling is expected Sunday into early next week as high pressure breaks down. Areas of smoke and haze from fires on the west slopes of the Sierra could affect Mono County today, with haze possibly pushing farther north into Alpine County on Friday.

San Francisco Weather:

Hot temperatures and dry conditions will persist through the work week as a strong upper level ridge remains over the state. Slight cooling is possible near the coast with a gradual cooling trend expected into the weekend as the ridge weakens.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Strong high pressure will continue to bring record and near record temperatures the next couple of days. Some cooling is expected over the weekend with a threat of afternoon thunderstorms over the Sierra Crest Saturday through Monday. Near or below normal temperatures expected through much of next week.

Hanford Weather:

High pressure will remain through Friday. Mostly clear skies and well above normal temperatures will continue over much of the area north of Kern County through the weekend. Tropical moisture will provide for some thunderstorms over the southern Sierra Nevada and Kern County mountains and deserts each day through Saturday. Otherwise, conditions are expected to remain dry through at least the middle of next week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

There is a chance of thunderstorms and showers in the mountains and deserts through Saturday. Temperatures and humidity will continue to peak into Thursday then slowly taper off on Friday and into the weekend. The marine layer will return and temperatures will be near normal by the middle of next week.

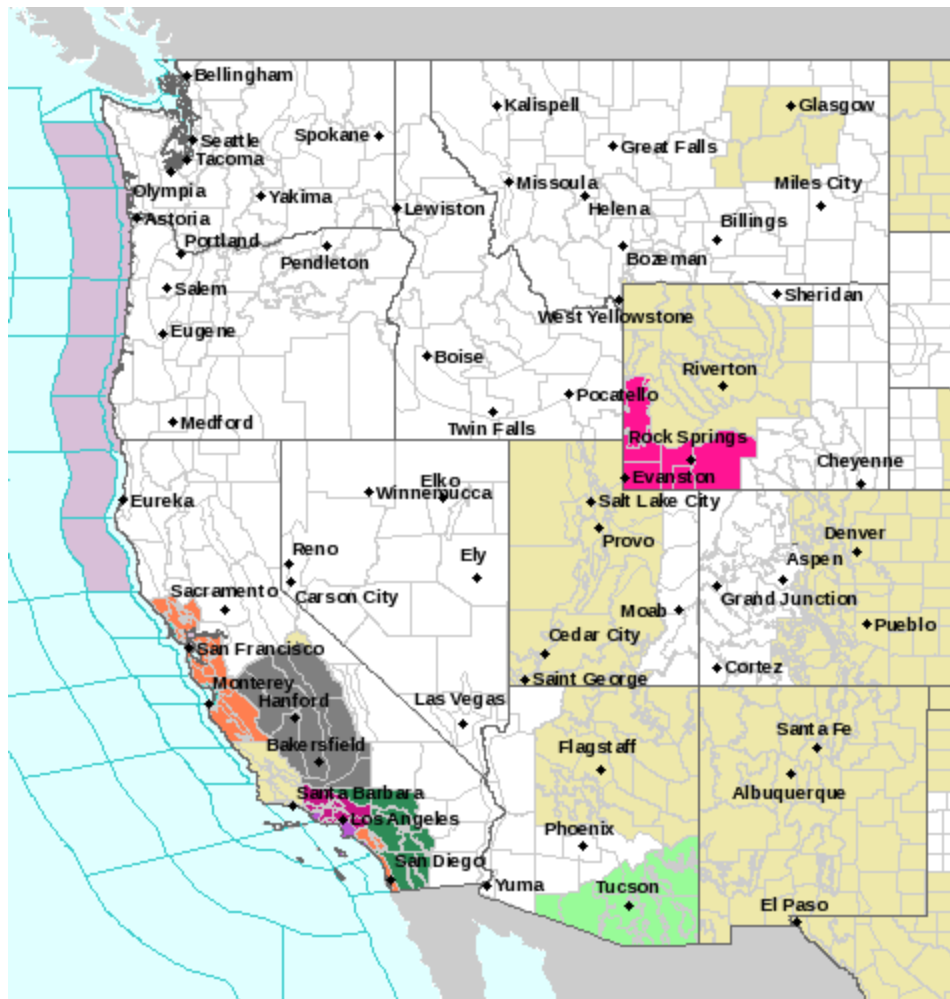

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Upper-level high pressure will continue hot weather today with slow cooling Friday into early next week. Afternoon and early evening heavy thunderstorms will continue over the inland areas today leading to an enhanced flash flood threat. The afternoon thunderstorm threat continues for the mountains and deserts through the weekend. Cooler and drier next week as a trough of low pressure moves in along the west coast.

Southeast California Weather:

Tropical moisture, remnants from former Hurricane Linda, will continue to cover the region today and tonight for a chance of showers and a few thunderstorms. Monsoon moisture will thin a little Friday and Saturday and along with a more stable atmosphere, partly cloudy skies with warmer afternoon temperatures are forecast. An influx of monsoon moisture from Mexico will return Sunday and next week along with a chance for showers and thunderstorms.
